

Connexions Editing Aide-Mémoire

You need to make text *italics*

`<emphasis effect="italics">These words will be in italics</emphasis>`

You need to make something **bold**

`<emphasis effect="bold">These words will be in bold</emphasis>`

You need a superscript.

`^{These words, numbers or letters will be superscript}`.

For example, “H⁺” will be “H`⁺`”.

You need a subscript.

`_{These words, numbers or letters will be subscript}`.

For example, “H₂O” will be “H`₂`O”.

You need to link a Table or Figure into the text. For example, “as shown in Figure 1 the structure is...”.

Each Figure or Table has a unique id number or word, e.g., you will see text of the sort `<figure id="id554545">`. The Figure's id number is thus “id554545”.

Insert a link in which the Figure or Table id is positioned. For example, “as shown in Figure 1 the structure is...” becomes “as shown in `<link target-id="id554545"/>` the structure is...”.

You need to link an equation into the text. For example, “as shown in Equation 1 the reaction is...”.

Each Figure or Table has a unique id number or word, e.g., you will see text of the sort `<equation id="eip-39">`. The Figure's id number is thus “eip-39”.

Insert a link in which the Figure or Table id is positioned. For example, “as shown in Equation 1 the reaction is...” becomes “as shown in `<equation id="eip-39">` the reaction is...”.

You need to insert a new Figure from a jpg

Give the equation a unique identifier, for example "Figure1".

Upload a new image and remember its name, for example "Figure1.jpg".

Then insert the following formatted text, `<equation id="Figure1"><media id="Figure1_media" alt=""><image mime-type="image/jpg" src="Figure1.jpg" id="Figure1__onlineimage" width="500" print-width="4.5in" /></media></equation>`.

You need to insert an equation that is a jpg image where the caption (or legend) for the figure will read "This is a Figure.".

Give the equation a unique identifier, for example "eip-38".

Upload a new image and remember its name, for example "Eq38.jpg".

Then insert the following formatted text, `<figure id="eip-38"><media id="id38_media" alt=""><image mime-type="image/jpg" src="Eq38.jpg" id="id38__onlineimage" width="500" print-width="4.5in" /></media><caption>This is a Figure.</caption></figure>`.
